WASTEWATER PRODUCTS

SCREENS

With over 45 years of expertise, AWP specializes in constructing and providing screens for the wastewater sector. AWP fabricates screens ranging from 5,000 gallons per day to several million gallons per day.

GRIT REMOVAL

AWP constructs grit removal systems with capacities ranging from 5,000 gallons per day to several million gallons per day.

ROTARY DRUM THICKNERS

AWP can provide our clients with the latest in rotary drum technology for solids thickening or trash removal.

DAF UNITS

AWP offers dissolved air flotation units utilizing cutting-edge fine bubble technology, ranging from 20 gallons per minute to several hundred gallons per minute. The DAF design effectively clarifies municipal waste as well as numerous industrial processes.

ALPHA WATER & POWER

WASTEWATER PRODUCTS

TWIN WIRE PRESS

AWP provides a comprehensive range of twin wire dewatering presses suitable for both municipal sludges and industrial dewatering. Press sizes are available from 0.5 meters to 3.5 meters.

SCREW PRESS

AWP provides a full range of screw presses designed for both municipal and industrial sludge dewatering.

MULTIMEDIA FILTRATION

AWP offers multimedia filtration options to our clients, featuring a diverse range of media including carbon, zeolite, granite, sand, and more. These filters come in diameters ranging from 10 inches to 160 inches, with typical construction materials being stainless steel.

MULTIMEDIA FILTRATION / DAF SKID

AWP offers multimedia filtration skids or DAF filter skids equipped with pumps, controls, and piping for our clients. Continuously striving to reduce costs for our customers, we provide a plug-and-play skid solution that minimizes installation expenses. This cost-effective approach is crucial for effectively managing construction expenses in today's market.
